

sHello Professor!

I am Srijita Vakiti and I am currently in the second year of the MSDS program. I am relatively new to Data Science as I did my undergraduate in Electronics and Communication engineering. Since I do not have professional experience in this (or any) field, I would like to develop projects with as many relevant softwares as possible to have a chance in the competitive job market.

Through my academic journey so far, I've cultivated a decent (I am not the judge) foundation in data analysis, machine learning, and statistical programming. I am looking forward to this class as handling big data is not something I am familiar with at all. I would really really appreciate it if you could please view my site/portfolio

(<https://sites.google.com/view/srijitaportfolio>) and give as much feedback as possible.

When I am free, I like to work on my skincare blog and write subtitles for international movies and TV shows.

I love cats too :)
